Chamber attends FACP Spring Conference

The Citrus County Chamber of Commerce recently attended the Florida Association of Chamber Professionals (FACP) Spring Conference to gain valuable insights and strategies to better serve our community. The conference covered key topics that directly impact our mission, including workforce development, engaging younger generations, and leveraging technology like artificial intelligence to improve Chamber operations.

Sessions on early learning and literacy highlighted the role Chambers can play in strengthening workforce readiness, while discussions on membership strategies equipped our team with new tools to attract and retain younger members. Additionally, the use of data-driven decision-making and AI applications will help us optimize operations and enhance member experiences.

We look forward to utilizing these new strategies to strengthen our services and continue fostering a vibrant business environment in Citrus County.
